How to Create a Mini Website (Profile Page)

You can create your own mini website in an instant by using the Account Page in your LINE Official Account. Simply select your desired plugins or topics, then your mini website is ready to go live. This feature also allows you to adjust anything on your mini website at any time – no need to hire anyone to create a website for you.

How to Create a Mini Website or Account Page

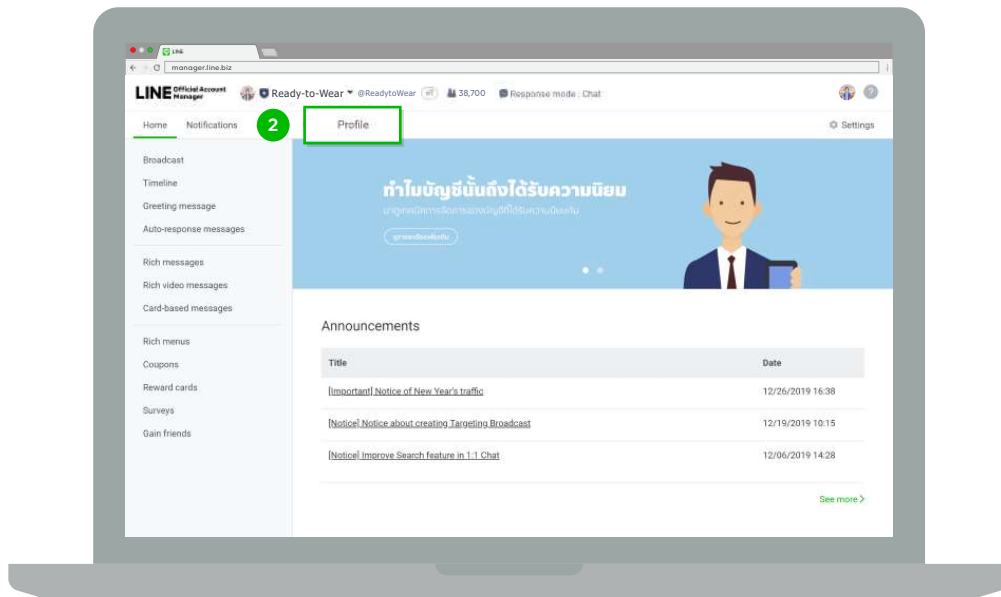

1. Go to manager.line.biz (LINE Official Account Manager)

** The recommended browser is Google Chrome*

2. Click 'Account Page'

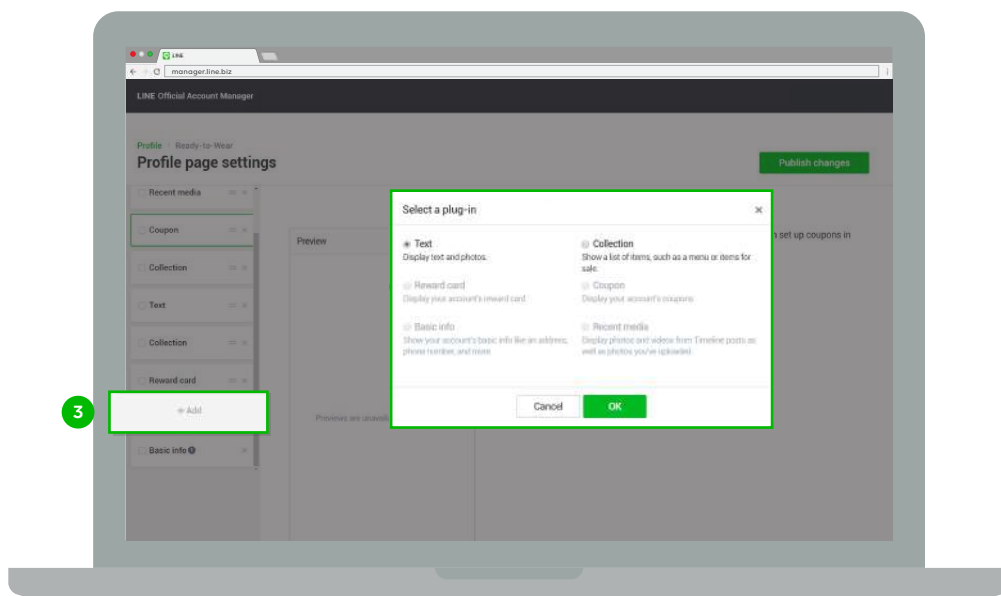

to set up your account

3. Click + Add

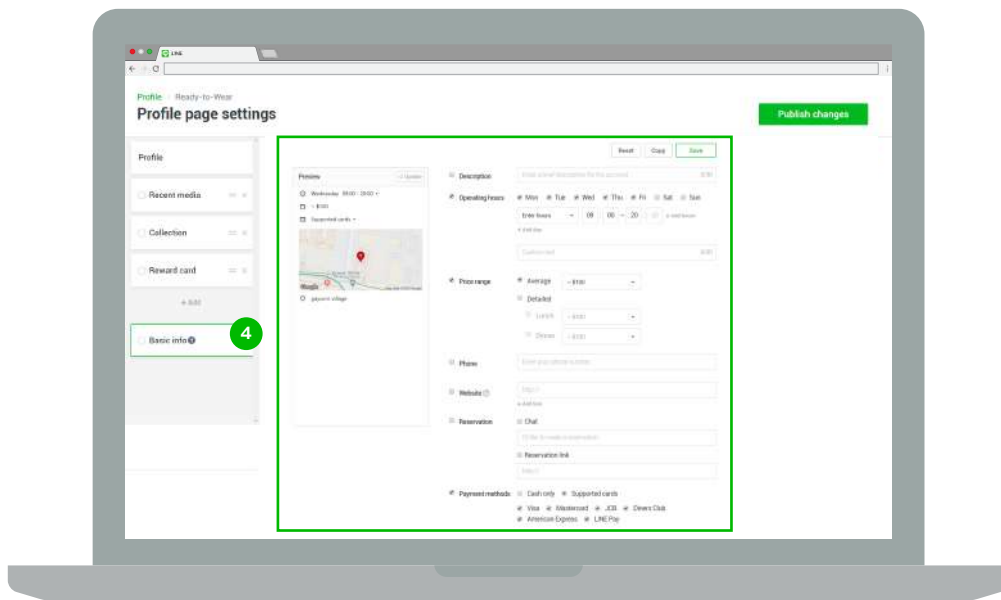

By clicking this button, you can add plugins or content you want to include on your mini website such as collection, coupon, or basic information. Once finished, click 'OK'.

You can add up to 20 plugins. Each message and each collection can contain more than one plugin. Moreover, each collection can include up to 100 pictures.

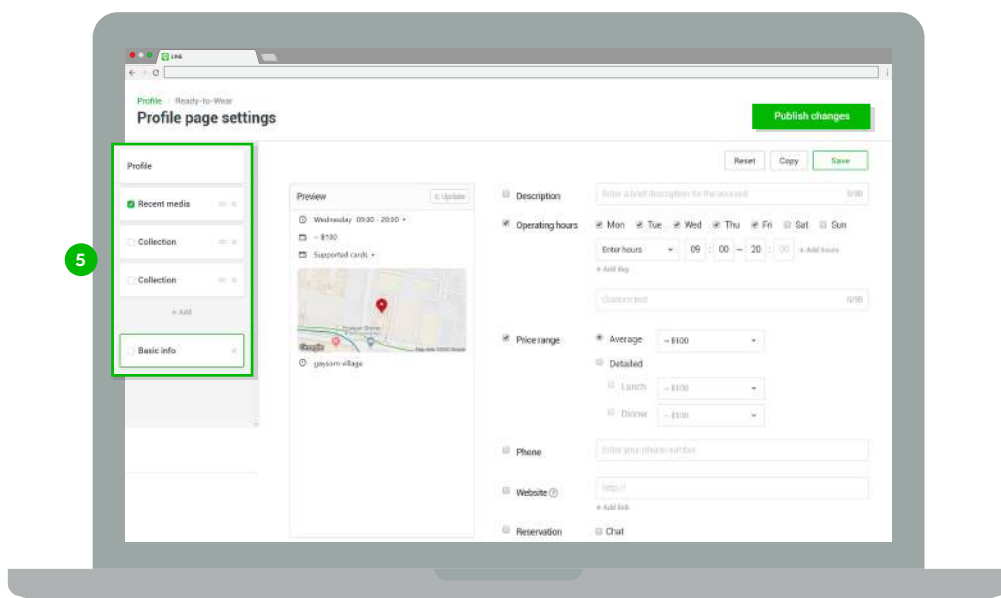

4. Enter the details for each selected plugin and click 'Save'

The system will automatically retrieve reward cards, coupons, and the latest content that you generated or posted. For other plugins, you can add pictures and text right away, as shown in a sample below.

5. Select your preferred plugins to appear on your mini website and click 'Enable'
