```

**Conversion code**  
Add a conversion code to the web page where you wish to measure conversions. Place the conversion code immediately after the base code.

```
<script>  
_l('send', 'cv', {  
  type: 'Conversion'  
}, ['12c105a2 e3e4 4c2e 8fc7 3057b7828d0f']);  
</script>
```

**Custom event code**  
Use custom events to categorize your web pages and track events of your choice. Change the tag's 'CustomEvent' to any custom name and add it to your website. You can then select your custom event when creating a custom audience. (Your custom event name must be 20 characters or less.)

```
<script>  
_l('send', 'ev', {  
  type: 'CustomEvent'  
}, ['12c105a2 e3e4 4c2e 8fc7 3057b7828d0f'], 'CustomEvent');  
</script>
```

## Edit User Role

The screenshot shows a user management interface. At the top, the page title is "User details: Test" with a "Settings" link. Below this is the "Organization permissions" section, which includes a "Role" dropdown menu currently set to "Administrator" and an "Edit" button. A blue box highlights the "Edit" button, with a green circle containing the number "2" and the text "Click 'Edit'". Below the main interface, a "Change user permissions" dialog box is open, also highlighted with a blue border. It features a "Role" dropdown menu with a list of options: "Administrator" (checked), "Operator", "Operator (data only)", and "Analyst (read only)". A green circle with the number "3" and the text "Select new role" points to this dropdown. At the bottom of the dialog are "Cancel" and "Save" buttons. A green circle with the number "4" and the text "Click 'Save'" points to the "Save" button.
